

Ryan Minor

Colorado Springs, CO | rminor2@uccs.edu | 512-954-8929

Summary

Motivated Computer Science student with hands-on experience in full-stack web development, bug tracking, and UI/UX improvements. Skilled in building both front-end and back-end systems using Go, Python, C++, JavaScript, HTML, and CSS. Experienced in collaborating with developers and product teams to deliver functional, user-friendly applications. Actively seeking opportunities to grow as a **Full-Stack Developer Intern**, contribute to dynamic teams, and apply problem-solving skills to create impactful software solutions.

Skills

Languages & Frameworks: Python, C, C++, Go, JavaScript, HTML, CSS

Tools & Technologies: GitHub, BeautifulSoup, pandas, Excel, VS Code

Core Competencies: Agile collaboration, bug triaging, UI/UX improvements, problem-solving, effective communication

Education

University of Colorado Colorado Springs (UCCS) — B.A. Computer Science

Expected Graduation: June 2027 | GPA: 3.2

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, C/C++, Technical Writing

Work Experience

Junior Developer Intern — SnapSOP

May 2025 – Present

- Organized and restructured bug tracking system for web and mobile app features, categorizing issues by type, priority, and developer ownership.
- Proactively identified, logged, and documented **40+ bugs**, ensuring transparency and accountability across the dev team.
- Resolved UI/UX and front-end issues directly using HTML and CSS.
- Collaborated in weekly meetings with developers and leadership to review progress, align priorities, and plan fixes.
- Maintained frequent communication with supervisor via Slack, providing progress updates three times per week.

Full Stack Developer Intern — Why Not Go Pro

May 2024 – Aug 2024

- Developed a full-stack web app using Go, PostgreSQL, HTML, and CSS to simulate and track basketball player scores.
- Implemented real-time score simulation and automatic leaderboard generation with persistent storage.
- Built dynamic HTTP endpoints integrated with a responsive front-end UI.
- Applied concurrency and server-client integration concepts for reliable performance.

Founder & Manager — M&M; PowerWashing

May 2020 – Aug 2022

- Managed a 3-person team, scheduling projects and coordinating work across three neighborhoods.
- Generated 80+ leads and converted 63 into paying contracts via outreach campaigns.
- Secured \$10,000+ in contracts within three months.

Projects

Ride-Sharing Fare Calculator (C)

- Designed a fare estimation system with distance/time pricing, input validation, random traffic simulation, and survey feedback.
- Integrated linked lists for dynamic ride data management and file I/O for storage and reporting.

CVPR Author Analytics Tool (Python)

- Scraped multi-year CVPR conference data using BeautifulSoup and pandas.
- Identified top contributors and authorship trends, exporting findings into Excel reports.

Customer Account Management System (C++)

- Built a menu-driven app with secure password validation to manage customer accounts.
- Implemented structured data and dynamic containers for flexible record handling.
