SUMMARY

Motivated Computer Science student with hands-on experience in full-stack development, bug tracking, and UI/UX improvements. Skilled in both front-end and back-end systems using Go, Python, C++, JavaScript, HTML, and CSS. Experienced collaborating with developers and product teams to deliver functional, user-friendly applications. Seeking opportunities to grow as a Full-Stack Developer Intern and apply problem-solving skills to impactful software solutions.

TECHNICAL SKILLS

Languages:

Python, C, C++, Go, JavaScript, HTML, CSS

Tools & Technologies:

GitHub, BeautifulSoup, pandas, Excel, VS Code

Core Competencies:

Agile collaboration, bug triaging, UI/UX improvements, problem-solving, effective communication

PROFESSIONAL EXPERIENCE

Junior Developer Intern — SnapSOP

(May 2025 – Present)

- Organized and restructured bug tracking system for web and mobile features, categorizing issues by type, priority, and developer ownership.
- Identified, logged, and documented 40+ bugs, ensuring transparency and accountability across the dev team.
- Resolved UI/UX and front-end issues using HTML and CSS.
- Collaborated in weekly meetings with developers and leadership to align priorities and plan fixes.
- Maintained consistent communication with supervisor via Slack, providing updates three times per week.

Full Stack Developer Intern — Why Not Go Pro

(May 2024 – Aug 2024)

- Designed and optimised a robotic control system, realizing a 12% performance improvement.
- Coordinated testing and validation, ensuring compliance with industry standards.
- Provided technical expertise, contributing to a 15% reduction in system failures.

Founder & Manager — M&M; PowerWashing

(May 2020 – Aug 2022)

- Managed a 3-person team, scheduling projects and coordinating work across neighborhoods.
- Generated 80+ leads and converted 63 into paying contracts.
- Secured \$10,000+ in contracts within three months.

EDUCATION

University of Colorado Colorado Springs — B.A. Computer Science

Expected Graduation: June 2027 | GPA: 3.0

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, C/C++, Technical Writing

PROJECTS

Ride-Sharing Fare Calculator — C

- Designed a fare estimation system with distance/time pricing, input validation, traffic simulation, and survey feedback. Used linked lists for ride data management and file I/O for reporting.

CVPR Author Analytics Tool — Python

- Scraped multi-year CVPR conference data with BeautifulSoup and pandas. Identified top contributors and authorship trends, exporting findings into Excel reports.

Customer Account Management System — C++

- Built a menu-driven app with secure password validation to manage accounts. Implemented structured data and dynamic containers for flexible record handling.
